Would you like extended care? It is offered 8:00am - 9:00am & 4:00pm - 6:00pm at all camps. Options are available immediately after choosing camp week.

Purchasing multiple weeks? Enter multicamp at checkout for an additional \$20 off each full-day camp week, multicamhalf for \$10 off each half-day camp week.

Cancellation Policy

If requested more than 30 days prior to the start of camp, receive a 100% credit for any other week of camp or a full refund less a \$25 administrative fee, per camp week.

If requested between 30 and seven days prior to the start of camp, receive a 100% credit for any other week of camp or a 75% refund.

[1] NASA: Academy of Future Space Explorers

Set your future space explorers on a trajectory from our Earth's atmosphere to the outer reaches of our solar system! This hands-on program brings them closer to the stars, planets, comets, and more. They learn about living in space, getting away from gravity, looking for space phenomena, and they participate in a rocket launch! For kids entering 1st-6th grade in the fall.

[2] Red Hot Robots

Children learn about the uses of robots in our world and spend time experimenting with super cool red-hot robots. They discover the science of circuits and how robots use sensors to explore things around them. They build their very own working robot to take home with them! For kids entering 2nd-6th grade in the fall.

[3] Forensic Fundamentals

Children explore the inside of the body and learn about the organ systems and the cells that it's composed of. They discover cool chemical reactions, and how to solve a crime, in this hands-on summer science adventure! For kids entering 1st-6th grade in the fall.

[4] Science in Motion

It's a different type of science everyday - from chemistry to physics and more! Kids put on their engineer's hats for this exciting week of science activities. They also learn about chemical reactions that they might encounter in their daily lives and the nature of birds and beasts, as they take a walk on the wild side of science. For kids entering 1st-6th grade in the fall.

[5] Dinosaurs & Ancient Worlds

Dig up dinosaurs and the ancient past! Kids learn all about archaeology and paleontology! They also study bone fragments, pottery shards, amber deposits, and fossils. Each class includes a take-home project, like a fossil reproduction or amber time capsule. Finally, every camp will receive an unforgettable visit from 'Tiny T' an amazingly lifelike 10-year old Tyrannosaurus Rex! For kids entering 1st-6th grade in the fall.

[6] Flight Academy

From the earliest flying machines to the first rocket flights, this hands-on program for children will allow them to build many different flying devices, see how Newton's laws of motion help explain how things move and how rockets fly, and show them how amazing our Milky Way is. For kids entering 1st-6th grade in the fall.

[7] Secret Agent Lab

This program features fun-filled, hands-on, secret agent-themed science activities that allow kids to play detective, explore forensic science, sharpen their surveillance skills, and crack encrypted messages. Kids become super sleuths! For kids entering 1st-6th grade in the fall.

[8] Eureka

Children overcome a series of challenges using basic materials, simple machines, tips from famous inventors, and most importantly, their minds. With a bit of ingenuity, they create catapults and forts, construct working light sticks, and assemble a set of circuits with batteries and light bulbs. For kids entering 1st-6th grade in the fall.
